

Flying Operations

STANDARDIZATION AND EVALUATION

This instruction provides guidance to establish the Air Intelligence Agency (AIA) Standardization and Evaluation (Stan/Eval) Program. It implements AFD 11-4, *Aviation Service*. This instruction applies to all AIA units and attached personnel with an airborne reconnaissance, remoted downlink, or airborne direct-support mission. This instruction also applies to the AIA-gained Air National Guard and Air Force Reserve units.

1. AIA personnel conduct airborne reconnaissance by flying aboard platforms operated by other commands, manning downlink positions, and performing airborne direct-support to accomplish the Air Force mission. AIA units will have a Stan/Eval program for these functions.
2. Standardization of training is key to providing a consistent product. AIA unit commanders need a tool to evaluate the effectiveness of training.
3. This guidance establishes the following responsibilities:
 - 3.1. HQ AIA is responsible for oversight of the field operating agency's Stan/Eval program. The Directorate of Operations (HQ AIA/DO) and the Directorate of Logistics and Engineering (HQ AIA/LE) establish policy and oversee the agency's Stan/Eval program.
 - 3.2. Wings and centers implement the AIA Stan/Eval program by developing instructions for: (1) training, (2) operations, and (3) flying.
 - 3.3. Unit commanders ensure adherence to policies and procedures developed by the wing or center.
 - 3.4. Operations officers comply with wing or center directives.

MICHAEL S. CASSIDY, Col, USAF
Director of Operations
